## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group I, claims 1-8 in the reply filed on July 14, 2005 is acknowledged. The traversal is on the ground(s) that the claims, as amended, may be not processed by hand. This is not found persuasive because the amendment does not obviate the processing by hand. In particular the word "by" does not require a computer to process the monitoring.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 10-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 14, 2005. Applicant has cancelled claim 9 from the March 23, 2005 Amendment.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims do not claim technological subject matter. The phrase "by a computer" does not require a computer to process the monitoring. A literal and reasonable reading of the claim may be nothing more than the

process being carried out by hand with a computer sitting adjacent to such an individual carrying out the method as claimed.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Sathyanarayan 6,691,106 or Tuzhilin et al., 6,871,186.

Sathyanarayan discloses electronically monitoring an individuals use pattern profile, e.g. 140, by data mining on an individual basis and analyzing such by the profile agent, e.g. 200.

Tuzhilin discloses electronically monitoring an individuals use pattern, e.g. grocery food consumption, by data mining on an individual basis, e.g. col. 14, lines 24-67, and analyzing such. It is noted the personal intelligent digital assistant (PIDA) may be used to perform web shopping.
